Paediatric Orthopaedics Update

1st and 2nd November 2014

Dewan Sekapur Sirih
Trauma Centre, UM Medical Centre
Kuala Lumpur, Malaysia

Hip Disorders

*Rare Musculoskeletal
Disorders*

MESSAGE FROM THE ORGANIZING CHAIRMAN

Dear sir / madam,

This symposium is organised to provide updates for clinicians and trainees on selected fields of Paediatric Orthopaedics. With better understanding of growth and bone remodelling in children, treatment options and indications for various hip conditions have changed over the years. New surgical procedures may be able to offer better treatment outcome in carefully selected patients. In addition, increasing number of diseases and syndromes involving musculoskeletal system are being reported in medical literature. Modification in the classification of more common conditions may help doctors and patients to better understand the disease process and help them to plan for more effective treatment and rehabilitation.

We are fortunate to have 3 experts from Hong Kong and Korea to share their experience with our participants. We also hope to establish better collaboration between various local and regional institutions in the management of difficult and rare musculoskeletal conditions for our children.

Thank you.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Saw Aik', with a long horizontal flourish extending to the right.

Dr Saw Aik
Organising Chairman
Paediatric Orthopaedics Update 2014
UM Medical Centre / NOCERAL

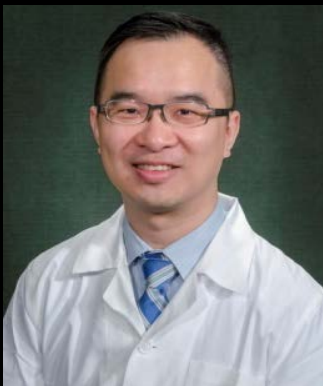

INTERNATIONAL SPEAKERS

Dr. Cho Tae-Joon

Professor

Seoul National University College of Medicine
